The funny side of our Tax Life...

Every year, during the first quarter, from that cold January into the hot days of April... we all squirm into our seats, on our beds, even while walking... thinking of our tax liabilities. Some families with strings of dependents display that wide grin of anticipation for their fat earned income credits while the juicy-pocketed professionals and business people think of ways and means to delay, delay...delay those much-awaited tax payments.

Diamond Financial is a member of an accounting society that had the smart attitude of looking at the funny side of the taxpayer... and it gives us delight to share this with all of our clients... and browsers of the internet... who like us are teetering on thread on the first quarter of every tax year.

Have fun viewing! Enjoy! And then you can later fret on how to pay off those dues!
