

## *Staffing Agency*

---

In the United States, a **Nurse Registry** is a staffing agency that provides nursing personnel to hospitals, medical offices and individuals. They are generally small, privately owned businesses.

**Medical Link** is a domestic corporation established in 1991, as a nursing registry, and was ceded over to Blue Bonnet Worldwide in 1993. It started deploying nurses to the different hospitals in the Metroplex, and in 1998 added LVN's, Medical Assistants and Radiologic Technicians to its manpower pool.

In 2001, Medical Link was servicing 11 hospitals and 3 clinics and added medical personnel in the administrative area. The tragedy of 9/11 has affected the subsidiary of the holding corporation and the financial crunch affected the hospitals and clinical institutions. A year later, assisted living facilities and home health care agencies started to dominate the medical field. Medical Link started deploying medical personnel to these agencies and to date, services five major home health agencies, a hospice and two internal medicine clinics.

Times are changing and instead of sending nursing personnel to the hospitals, Medical Link diverted in servicing these institutions with registered nurses coming from the Philippines, Tashkent and Nepal. The Agency assists these hospitals in selecting their candidates, even bringing their recruiter to the countries where qualified candidates are available and charges them with fixed fees for bringing in these nurses.

The new management intensified its operations to include Physical Therapists, Home Health Administrators, Medical Technologists, Laboratory Technicians and Clinical Records Technicians in its pool to support the growing home health industry in the Metroplex. It also joined venture with TAGS (Triumphant Alliance Global Services, Inc.) based in Murphy, Texas, a licensed and bonded personnel employment service, to assist in the expeditious processing of applicants based on a first-come, first-served basis, qualifications for the respective positions applied and the guaranty of availability for work when the visas have been approved.

Medical Link is a subsidiary of Blue Bonnet Worldwide Services, Inc., a member of the Union League Organization (ULO) based in Makati, Philippines.
